# Colour Chart

Here are the 12 electroplated colours we offer.

Please note that colour is not a perfect science and there will always be a slight degree of colour variation.

It is also important to know that the colours shown here are just that...colours

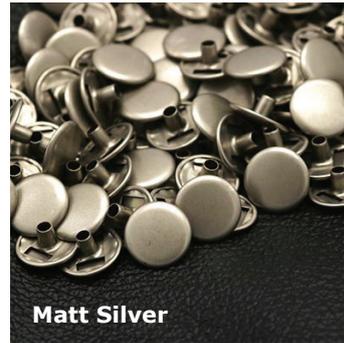

So when we say "Gold", the colour is gold, the product is not made of gold.

Please note that while we have made every attempt to display the colours as accurately as possible there are other factors that must be taken into consideration when selecting a colour. We photograph our products in a controlled lightbox. Monitors and printers will display the above photos differently depending on their individual configurations. This is beyond our control.

When choosing a product we recommend you ask for a sample first to ensure you are getting what you want.
